SELECTMEN'S REPORT

FINANCIAL

It is recommended that we raise and appropriate the sum of \$1,000.00 for Capital Reserve Fund for Fire Equipment to be added to the present fund.

POLICE COURT

The Court is one of three inactive courts in the State of N. H. The Governor has refused to appoint a Justice unless the Selectmen would recommend a resident of the Town. We have found no one willing and suitable.

ROADS

The roads were not tarred this past year. It is hoped that the Road Agent will be able to do this work this coming year.

PLANNING BOARD

No chairman was found for the Board. The Selectmen did not hold the special town meeting on zoning since no one was prepared to present an ordinance.

FENCE

The Selectmen did not build the fence at the Daniels Academy Building since insufficient funds were voted. For the amount raised only the lightest kind of fence could be built. An article is in the Warrant for additional money for this purpose.

APPOINTMENTS

The Selectmen recommend the cancellation of all existing appointments and have placed Article 8 in the Warrant for this purpose. At the present time a large number of police appointments are outstanding, some of them unknown. A year to year basis appears a better way to handle the matter of appointments.

TOWN HALL

A great improvement has been made in the upstairs meeting hall.

The Selectmen recommend the appointment of a committee and setting aside \$300.00 from the Town Hall Funds, to add a fire escape to the Town Hall.

The Smokey Bear Program put on last Spring by the State Forest Fire Service for the local school children was received with much enthusiasm and we feel it was very effective in acquainting the youngsters with the fire danger and in showing them how they as individuals can help prevent Forest Fires.

Your cooperation in obtaining permits before burning and promptly reporting any fire that is out of control has contributed greatly to keeping the cost of this Department at a minimum. Your help is most gratifying.

This certificate is being awarded as testimony in our desire to offer safety and enjoyment in the use of our highways.

In testimony whereof, I thereto set my hand and cause to be affixed the seal of the Motor Vehicle Department, at Concord, this 31st day of December A. D. 1957.

Town of Brookline
Police Department
William H. Quigley, Chief

Dear Chief,

There is no better barometer to indicate the results of many hours of training to a Police Department than can be gained by this Department being sent to a neighboring town for Police duty.

The conduct and ability in which your Department conducted themselves on our recent 225th Anniversary was of the highest caliber and certainly showed the results of those many long hours of training.

My sincere thanks to you and your men for their able assistance.

Sincerely,

DONALD R. MORSE

George Hamel
William H. Quigley, Jr.

The Police Department of Brookline wishes to express its thanks to Fred Nelson of Wilton for his cooperation in furnishing radio transmitter service to the Department 24 hours a day, 7 days a week, at no charge to the Town. The radio has, as anticipated by this department, proved to be invaluable in communicating within the Town and working with other Departments. Further, it has saved much time and mileage.

The Police Department has sponsored, with the assistance of the American Automobile Association and the local school authorities, a fully trained and equipped Safety Patrol, consisting of nine members—students of our local schools.

Respectfully submitted,

WILLIAM H. QUIGLEY

ADMINISTRATION

I herewith present my nineteenth Annual Report. It includes this discussion and other reports herewith.

A. Teachers

I am happy to report no changes in the teaching staff. This continuity of instruction is very valuable.

Throughout this Union, we have been trying to reach a basis for teachers' salaries. With changing and upward revisions nearly every year, we could easily find ourselves in the unenviable position of paying a beginning teacher (because we had to have her) more than or the same as one already on the staff with more experience. So, one of our members made an analysis when we had more stable conditions and discovered that, with a four-year degree, teachers' salaries advanced 4% of the base per year with each year of experience until a maximum was reached. For instance, if the base was \$2,500 for a beginner, her second-year salary was \$2,600 and the third \$2,700, etc. Salaries for teachers with less than this Bachelor's degree and those with Master's degrees were compared with the base and found to be respectively 8% less and 8% more in each year of experience. Therefore, it was only necessary to determine the beginning salary and all salaries would be whatever percentage of that base the teacher's experience warranted. The present budget has been constructed with this in mind but does not implement this scale completely. It is intended to be spread over this year and the next.

B. Costs

Each year the State Department of Education is authorized to fix maximum liability for tuition. For Grades 9-12, the liability this year is \$410 per pupil, next year \$367; for Grades 1-8, \$251 and \$232. The reduction is due to a change in the law governing the computations. Tuition is chargeable at these rates or lower if the receiving district has a lower rate and a 2% rental charge, as approved by the State Board of Education, may be added.

Nashua's rates to you are \$354.00 and \$231.00 this year; \$367.00 and \$232.00 for next year.

C. Appreciations

I am very appreciative of the splendid work of the Teachers, the understanding and interest of the School Board and the Cooperation of the community toward making good schools better.

Very respectfully,

HAROLD C. BOWLEY

Superintendent of Schools

REPORT OF STATE DEPARTMENT OF HEALTH

The State Department of Health, with the cooperation of State and local School departments, conducted a series of three clinics at Daniels Academy, administering Salk vaccine for the immunization of children against Poliomyelitis.

A group of local women serviced the clinics which were open to all children under the age of twenty, and pregnant women. Registered nurses in the area assisted Doctors Oscar Burns and Augusta Law of Milford in giving the vaccine.

There were one hundred sixty-six pre-schools, three hundred school children and seven pregnant women received from one to three inoculations at these clinics.

The Polio Foundation through it's "March of Dimes" fund provided the State Health Department with the first Salk vaccine.

OUR HELPING TEACHER

By Mabel I. Connolly

In this year's report to you who are interested in education in Union #40 I would like to mention the work being done by our teachers in locating our gifted children and providing for their special abilities. We realize there is a need for a definite program which will help them do an even better job, and one is now in the process of evolution. Two other areas of concern to all—science and arithmetic—should also be brought to your attention.

THE GIFTED

We consider as gifted any child with superior intelligence or some special talent or ability. We feel that it is his right to be allowed and encouraged to develop such powers to the utmost. Through our testing and with guidance starting in the first grade these children with special needs are located and a program is adopted to their needs. We now have the nucleus of a library which has already supplied enrichment for the many children throughout the union who have advanced reading ability. These books are on a loan basis and are in constant circulation, especially during the last half of the year when these pupils have read everything available in their classrooms. Other books, materials and ideas are available in other subject areas for pupil projects, research and reports. The teachers are to be congratulated on the fine work they are doing with these children in spite of all the extra time also involved in helping the slow-learners in the class.

SCIENCE

We have no way of adequately measuring the quantity or the quality of the science program within this union. In fact there is no co-ordinated program, as such, due mainly to the lack of an up-to-date program of studies usually suggested by the State Department of Education. However, such a program is now in the process of study with two of our teachers on the state-wide Science and Arithmetic Committee. We should have something very definite by another year for all grades. Even though not following a "state outline" we do have a great deal of science being taught in every school, and being well taught.

ARITHMETIC

An excerpt from the January 1958 Helping Teacher's Bulletin (Union #40) in a report to the teachers gives some indication of the work being done in this area.

"As a whole, the results of the arithmetic tests were quite satisfactory in that on a union-wide basis they equaled or surpassed the National norm. Very few weak spots were found among the several towns Granted the test results show we are doing well in the area of mathematics, we shall do better and for two very good reasons: because we *want* to improve and because we are just completing the adoption of some of the best methods and materials for the teaching of arithmetic.

It is interesting to note some of the results already evident, in that for the first time to my knowledge the arithmetic reasoning scores are higher than are the fundamentals. This is true in 20 out of 24 final scores. We want pupils to first make full use of their intelligence through reasoning and understanding of numbers so that the memorization of number facts and fundamental processes can be truly effective.

Actually, of the seven grades tested (3-9) throughout the Union the average norm is three months higher than the national norm, as compared with the average reading norm of seven months above the national norm in Grades 1-9. Without sacrificing our splendid gains in reading we hope the next round of arithmetic tests three years hence will show an equal superiority.

Presumably the contributions to science and mathematics will come from the upper fifth of most any class. It is encouraging to note that the range of arithmetic achievement in this group in grade seven runs from grade 8.5 to 10.5 in grade eight from 9.5 to 11.5, in grade nine from 10.8 to 14.5. We are moving in the right direction!"

I would like to take this opportunity to again thank the parents, teachers and principals, members of the school boards, and Mr. Bowley for their cooperation in our mutual endeavors for better education for our children.

Respectfully,

MABEL I. CONNOLLY,
Helping Teacher
